

Dylan Pham

BUSINESS DATA ANALYST · MACHINE LEARNING ENGINEER

☎ (+358) 504 763 601 | ✉ hoangdungpham0703@gmail.com | 🌐 dylanpn

Summary

Machine Learning Engineer and business-facing data practitioner with a Data Science master's background and experience translating stakeholder needs into production analytics, ML pipelines, and decision-support workflows. Strong in Python, SQL, statistical modeling, data pipeline design, and cross-functional delivery with product, architecture, and business partners. Brings end-to-end ownership from requirements and data exploration through validation, deployment, monitoring, and iterative improvement.

Work Experience

Oy L M Ericsson Ab

Jorvas, Finland

MACHINE LEARNING ENGINEER | MACHINE LEARNING OPS

Jan. 2023 - Now

- **Predictive Analytics Delivery:** Developed an ML application for a Software-Defined-Network product to detect bad weather conditions from network transmission signals, supporting proactive maintenance and reliability decisions.
- **Data Pipeline Optimization:** Implemented concurrent processing for time-series network data, achieving 100x faster data insertion and improving scalability for large-scale analytics workloads.
- **End-to-End ML Lifecycle:** Built and maintained cloud-based ML systems using Docker, Kubernetes, Kaniko, Helm, Jenkins, DVC, Kubeflow, and MLflow, covering reproducible experiments, deployment, monitoring, and lifecycle management.
- **Analytics Quality and Compliance:** Managed third-party Python dependencies across codebases, improving release readiness and GDPR compliance while reducing exposure to security issues.
- **Stakeholder Collaboration:** Worked with data scientists, network architects, and product teams to translate operational needs into AI-driven solutions for real-time network optimization.
- **Team Enablement:** Designed systematic teammate and agentic-AI workflows that improved delivery speed by 2x while preserving code quality, security, and performance standards.

Frontier Leader Institute Vietnam

HCM City, Vietnam

CIO | BUSINESS PARTNER

Nov. 2024 - Now

- **Business Data Workflow:** Restructured organizational data flows by integrating video recordings, Google Forms, participant feedback, and operational inputs into a human-AI workflow, improving knowledge capture and internal information flow.
- **Decision-Support Infrastructure:** Designed and managed cloud infrastructure for website hosting, data storage, AI processing, and chatbot deployments, establishing an AI-native operating environment and enabling up to 5x employee productivity.
- **Strategic Partnership Development:** Identified and developed cooperation opportunities between European organizations, universities, and FLI Vietnam, expanding the quality and range of Frontier's product offerings.

Nokia Bell Labs

Espoo, Finland

RESEARCH ASSISTANT

Feb. 2022 - Aug. 2022

- Quantified **RNN model performance** for **robot destination prediction**, evaluating predictive quality under obsolete network-system constraints.
- Designed and implemented a **real-time matching and scheduling algorithm** to optimize latency and reliability for device-to-control station communication.
- Built **MATLAB** simulations for multi-device scenarios, evaluating model performance and operational trade-offs.
- Used Python and pandas for data cleaning, transformation, and enrichment before loading data into databases.

Nexttech Group Of Technopreneurs, Ltd.

Hanoi, Vietnam

MACHINE LEARNING ENGINEER

Jun. 2019 - Mar. 2020

- Implemented machine learning to **enhance an OCR system** from given texts, reaching 90% accuracy.
- Led one teammate to deliver and sell the OCR solution for **\$10,000** in under one month.
- Delivered an **object and face detection** solution for video, reaching 95% accuracy.
- **Statistically evaluated** customer financial balances for individuals and organizations.

RikkeiSoft Co. Ltd

Hanoi, Vietnam

BACK-END WEB DEVELOPER

Sep. 2018 - May. 2019

- **Led a 3-person team** maintaining management systems for 2 chain-store customers with 30+ branches.
- Built and maintained Kintone-based systems customized with JavaScript and Python to categorize products and prices and generate manager-facing operational reports.

Education

Aalto University, University of Twente

Helsinki, Finland - Enschede,
Netherland

DOUBLE DEGREE MASTER STUDENT - MAJOR IN DATA SCIENCE, MINOR IN ENTREPRENEURSHIP

Sep. 2020 - Sep. 2022

- ACHIEVEMENTS: Monthly EIT scholarship for Excellent Student
- GPA: 4.2

FPT University

Hanoi, Vietnam

BACHELOR IN SOFTWARE ENGINEERING

Sep. 2014 - Aug. 2018

- ACHIEVEMENTS: Full scholarship from FPT University
- GPA: 4.1

Skills

Analytics & Programming	Python, SQL, pandas, MATLAB, Golang
Business Analytics	Stakeholder Translation, Insight Generation, Operational Reporting, Data Cleaning, Data Transformation
Statistical & ML Methods	Predictive Modeling, RNN, Feature Engineering, Model Evaluation, Simulation, Optimization
Frameworks	TensorFlow, PyTorch, Scikit-learn, Keras, Robot Test Framework, OpenAPI/Swagger
Cloud, DevOps & MLOps	Docker, Kubernetes, Kaniko, Helm, Jenkins, Git, DVC, Unix/Linux, KubeFlow, MLFlow, CI/CD
Language	English, Vietnamese
